## Antibacterial Bamboo, the most effective natural protection against mites .

### Where are Mites?

They are mainly found in mattresses, pillows, linens and other textiles. These places have the needed degree of heat and moisture, just like their food the human skin scales we let go while we sleep.

### Why allergies occur?

An allergy is an abnormal reaction of the body, caused by allergens. The most common causes are usually the pollens, house dust mites, fungus and domestic animal epitheliums.

### To whom allergies cause more problems?

Since mites difficult life and create numerous hassles such as (conjunctivitis), (rhinitis) and (asthma), the most affected are the elderly bedridden, operated patients, children and athletes.

**In one year 2,000,000 mites inhabit in an unprotected bed.**

# Comparative Chart

| QUALITIES                    | BAMBOO + TPU | ORGANIC COTTON + TPU | COTTON + TPU | POLYESTER + PU INDUCED |
